What is De Odor Works:

De Odor Works is a revolutionary new deodorant product made entirely of medical grade, lightweight (approximately 2 ounces) stainless steel. Its secret is the unique reaction that occurs when ordinary running tap water and stainless steel combine to neutralize odor. Using stainless steel with running water is a recognized method of eliminating the volatile sulfur compounds (VSC) that cause odor. Stainless steel is biocompatible to human tissue, so you can use De Odor Works anywhere on your body without any adverse effects.

Recently, I got to check out [De Odor Works](#). I will be honest, I was thinking this was some sort of joke. I mean how can rubbing this thing under my arm help control odor. So, I decided to put De Odor Works to the test, we all know how bad onions smell, and it is a bit hard to get onion smell off your hands, even with soap I have issues getting the smell off, so I went and took an onion cut it open, then I rubbed it all over my hand. I then did what was directed on the instructions, and I placed my hand under running water, rubbed the De Odor Works up and down my hand for 30 seconds. When the 30 seconds was up I smelt my hand and NO ONION SMELL. I know when I handle onions, I will have the onion smell on my hand for a while after words.

I was surprised on how well this product worked. De Odor Works, can be used on all areas that may cause you odor embarrassment, De Odor Works is simple to use, just take a shower and wash as normal, then rub De Odor Works under running water on those problem areas, such as under arms, groins, and feet.

Not only does this help you control your odor, it will also help you save money on the pocket book. De Odor Works has made its appearance on The Doctors head on over to [De Odor Works](#) and check out the small video clip. De Odor Works is backed up by a 30 day Satisfaction Guarantee, so if you get it, and it does not work like you are expecting it to simply return it with proof of purchase, in 30 days for a full refund (except shipping and handling)!

I have been using this product for the past few weeks, and I am sold!

I was also able to check out De Odor Works sister product [Waterworks](#), this is an all natural douche. We all know douches contain chemicals that can cause health problems, this is one reason I would not use them. I was scared it would cause more problems then they was worth. So when I got Waterworks, in the mail a long with the De Odor Works I was excited.

What is WaterWorks?

It is an all-natural therapeutic vaginal cleansing system designed to reduce or eliminate vaginal odor. The system consists of a patented stainless steel nozzle that produces a gentle stream of tap water. When the nozzle and tap water make contact with the walls of the vagina, vaginal odor is washed away safely and effectively.

LOVE this product, I use it 3 times a week, and it makes me feel more refreshed.

Purchase:

You can purchase De Odor Works on the [De Odor Works](#) site, Amazon or Drugstore for \$19.95 plus shipping and handling. WaterWorks can be purchased on the [WaterWorks](#) site, Amazon or Drugstore for \$69.90.

Connect With De Odor Works and WaterWorks:

Websites: <http://www.deodorworks.com> and <http://www.waterworkshealth.com>

Disclosure: I received both product for review only, no other form of payment was received, this is my honest opinion and others may vary.

Ya know, I've used steel soap for my onion hands (I cook all the time and love onions) but never thought that it would work on the body too! That's crazy. I also like the idea of the douche. I'm definitely going to have to try that product. Like you, I don't like the chemicals associated with the commercial ones so this sounds great.
