

De Odor Works — Lady and the Blog

Did
you

know that you can remove unpleasant body odor using just the water from your tap and stainless steel? It's true! For many people, finding a natural, safe alternative to aluminum-based deodorants can be challenging, especially as their body odor might not be masked as easily as they would prefer. With De Odor Works, rather than cover up the odor, you can stop body, groin or foot odor right at the source, using absolutely no aluminum or other harsh chemicals. This ingenious, effective deodorant product neutralizes odor by combining ordinary tap water and stainless steel, which in turn gets rid of the volatile sulfur compounds (VSC) that are the cause of body odor. To learn more about the health benefits of using De Odor Works instead of commercial deodorants or anti-perspirants, click [here](#).

At just \$19.95 – this is an affordable option, as well, it it never needs to be replaced! It is recommended that you use De Odor Works daily as part of your normal showering routine for the best results.
